Playspace Development

Kepal Multiplay Unit Steel Multiplay Unit

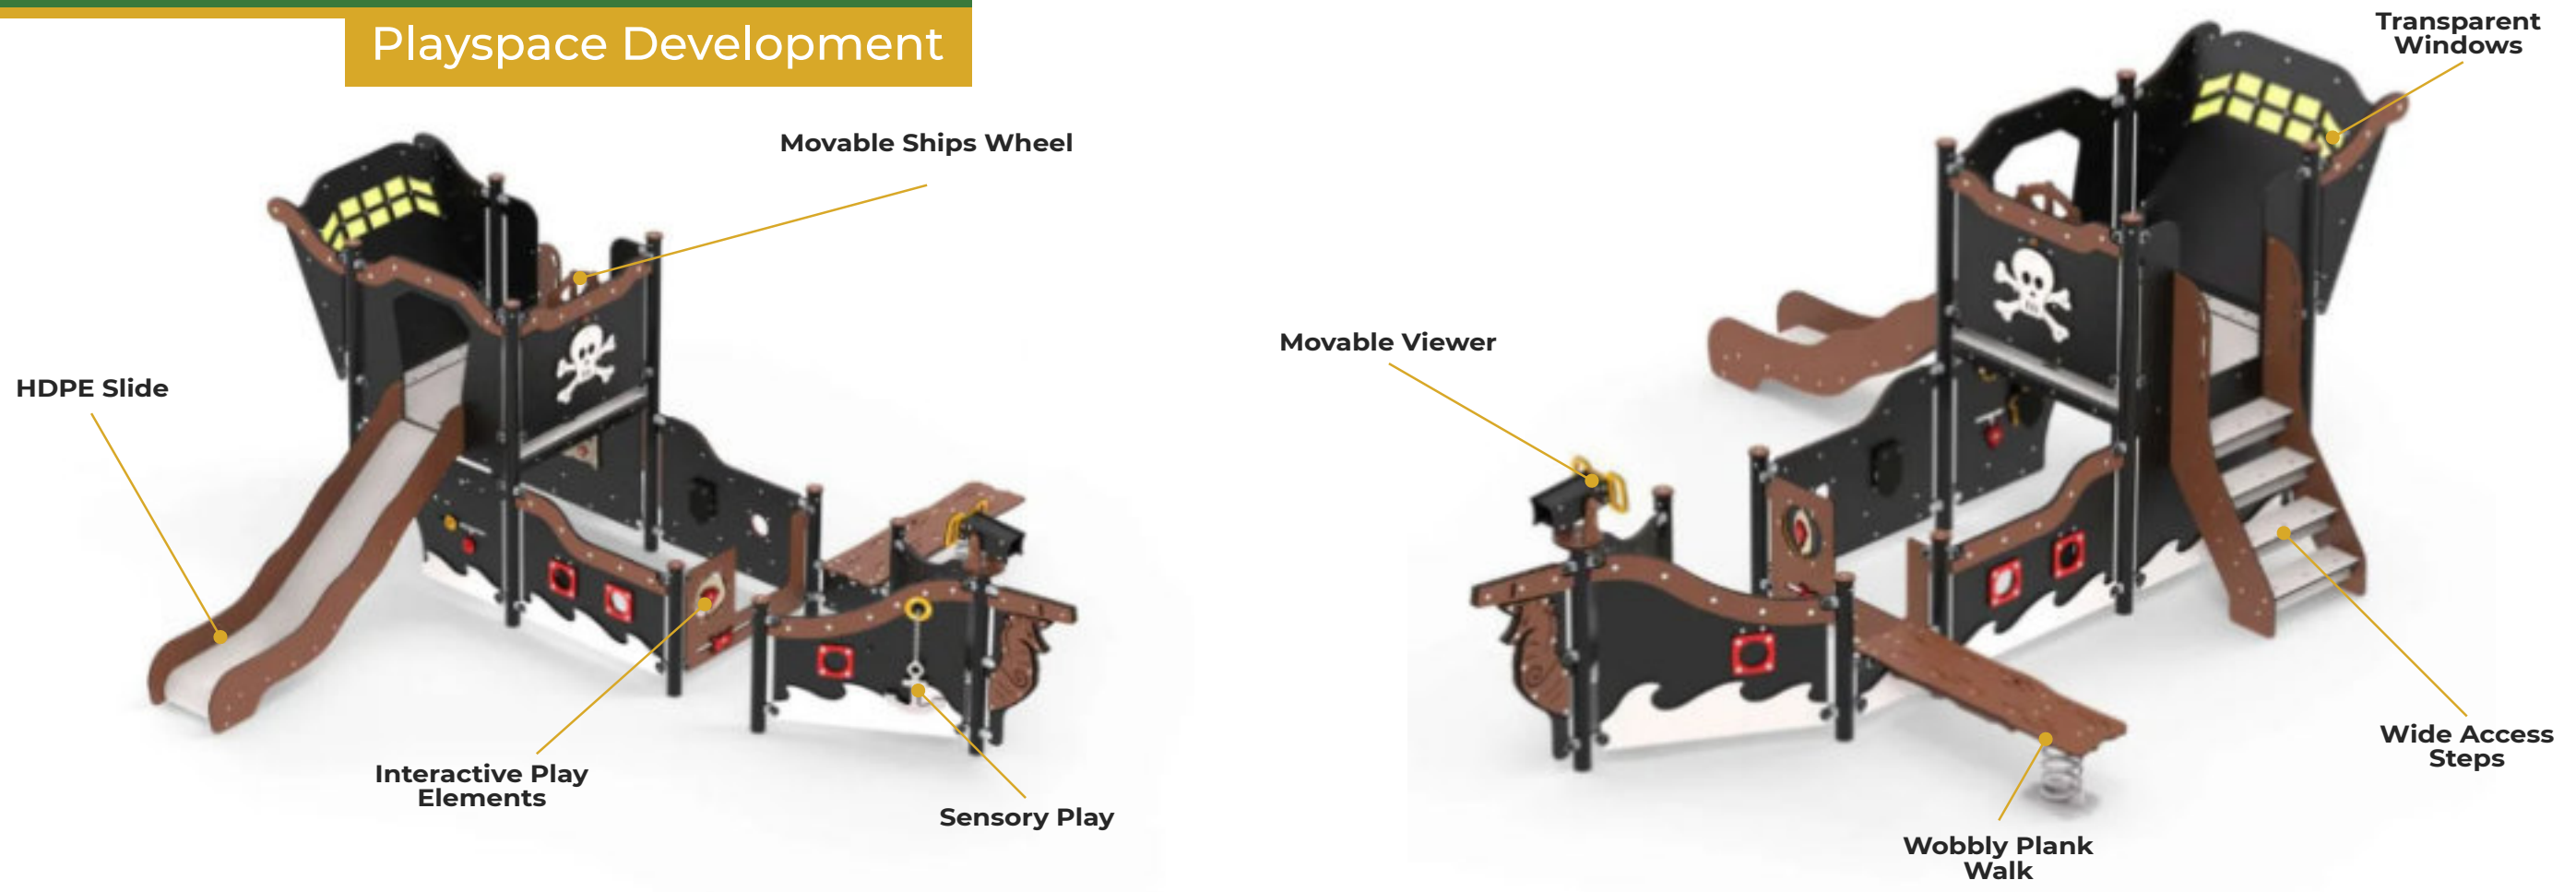

The Kepal twin tower unit provides 8 play features including a lookout tower, climbing wall, hdpe slide, net bridge, tunnel crawl and two activity play panels. The play activities test balance and coordination as well as strengthening fine motor skills and creative and cognitive abilities.

Elements Of Play **7**

Suitable for Children Aged **3+**

Playspace Development

Nathalie Piate Ship

Medium Sized Pirate Ship

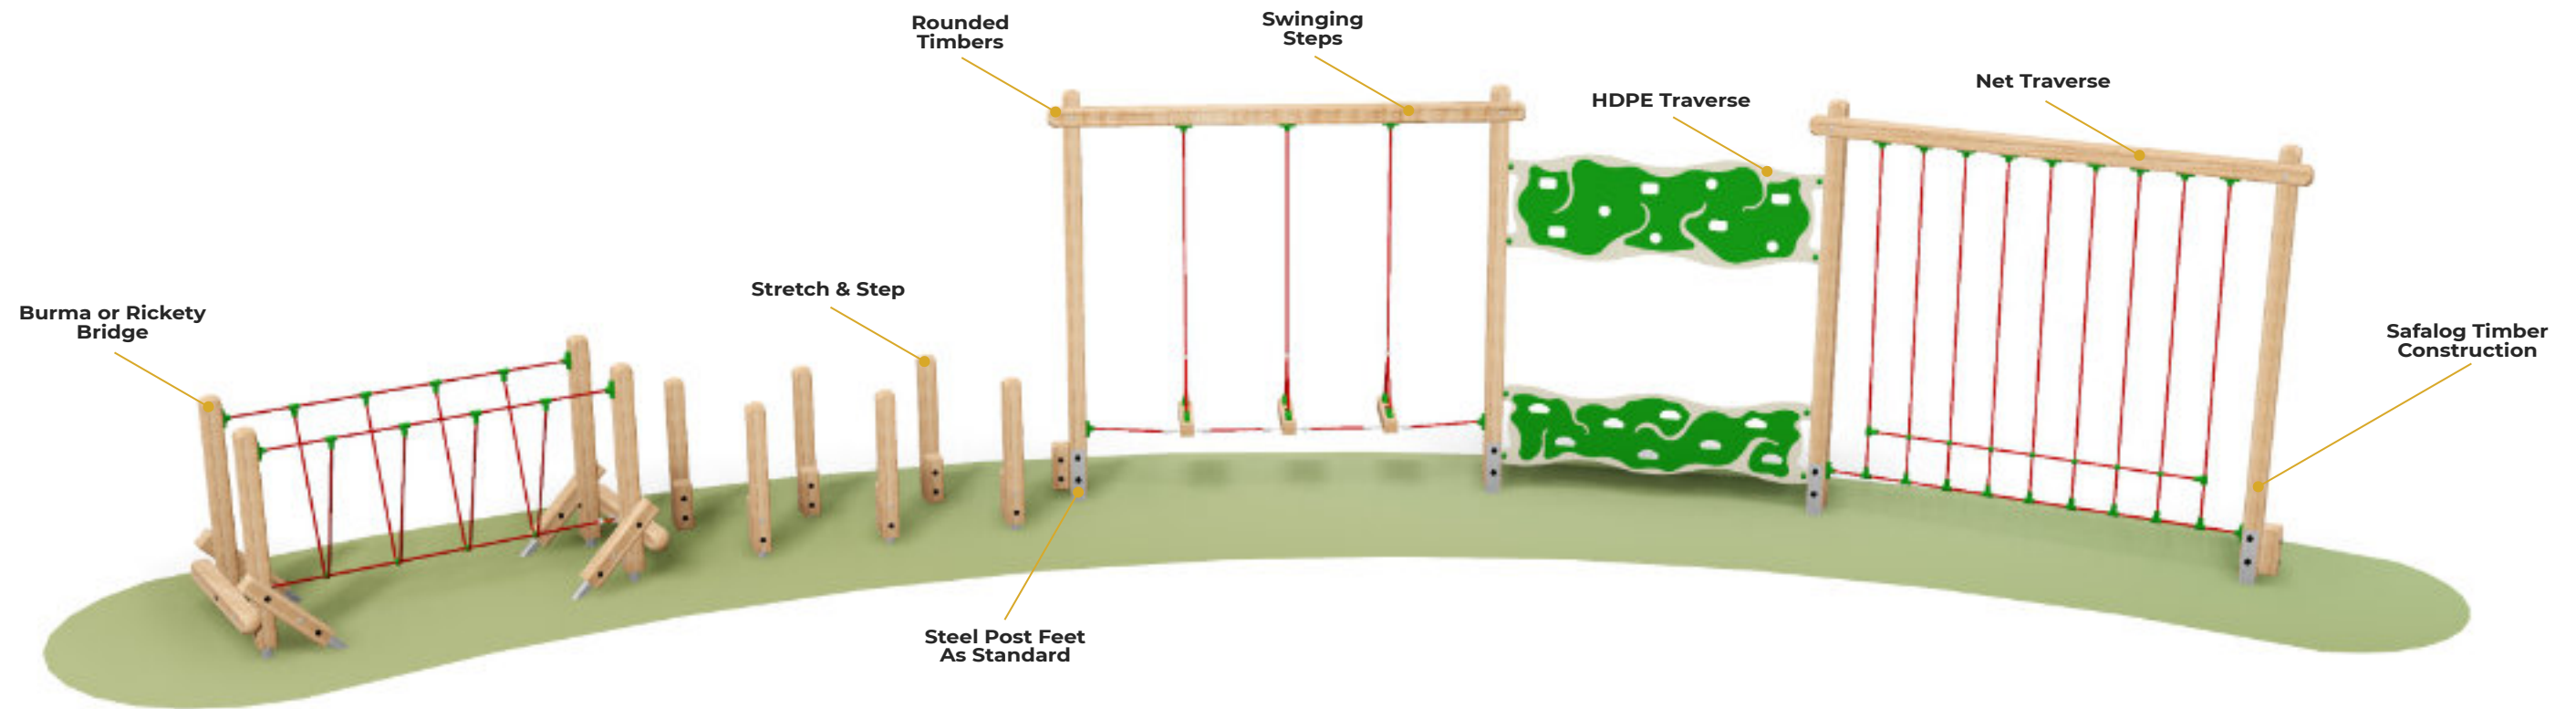

Nathalie is a medium sized pirate ship, and is especially popular due to its slide. Besides the slide, the Nathalie is also filled with other play activities. In the bow you can look out for land through the telescope, which can tilt and turn. You can also raise the anchor or control the movable compass or balance on the wobbly plank. The spring under the plank adds an extra challenge and a fun element to the pirate ship. On the top deck you will find the ship's wheel, from where you can enjoy views across the playground or go down the slide.

Elements Of Play **9**

-  Agility
-  Balance
-  Social
-  Imagination
-  Role Play
-  Sliding
-  Sensory

Suitable for Children Aged **3+**

Playspace Development

Irazu Trim Trail

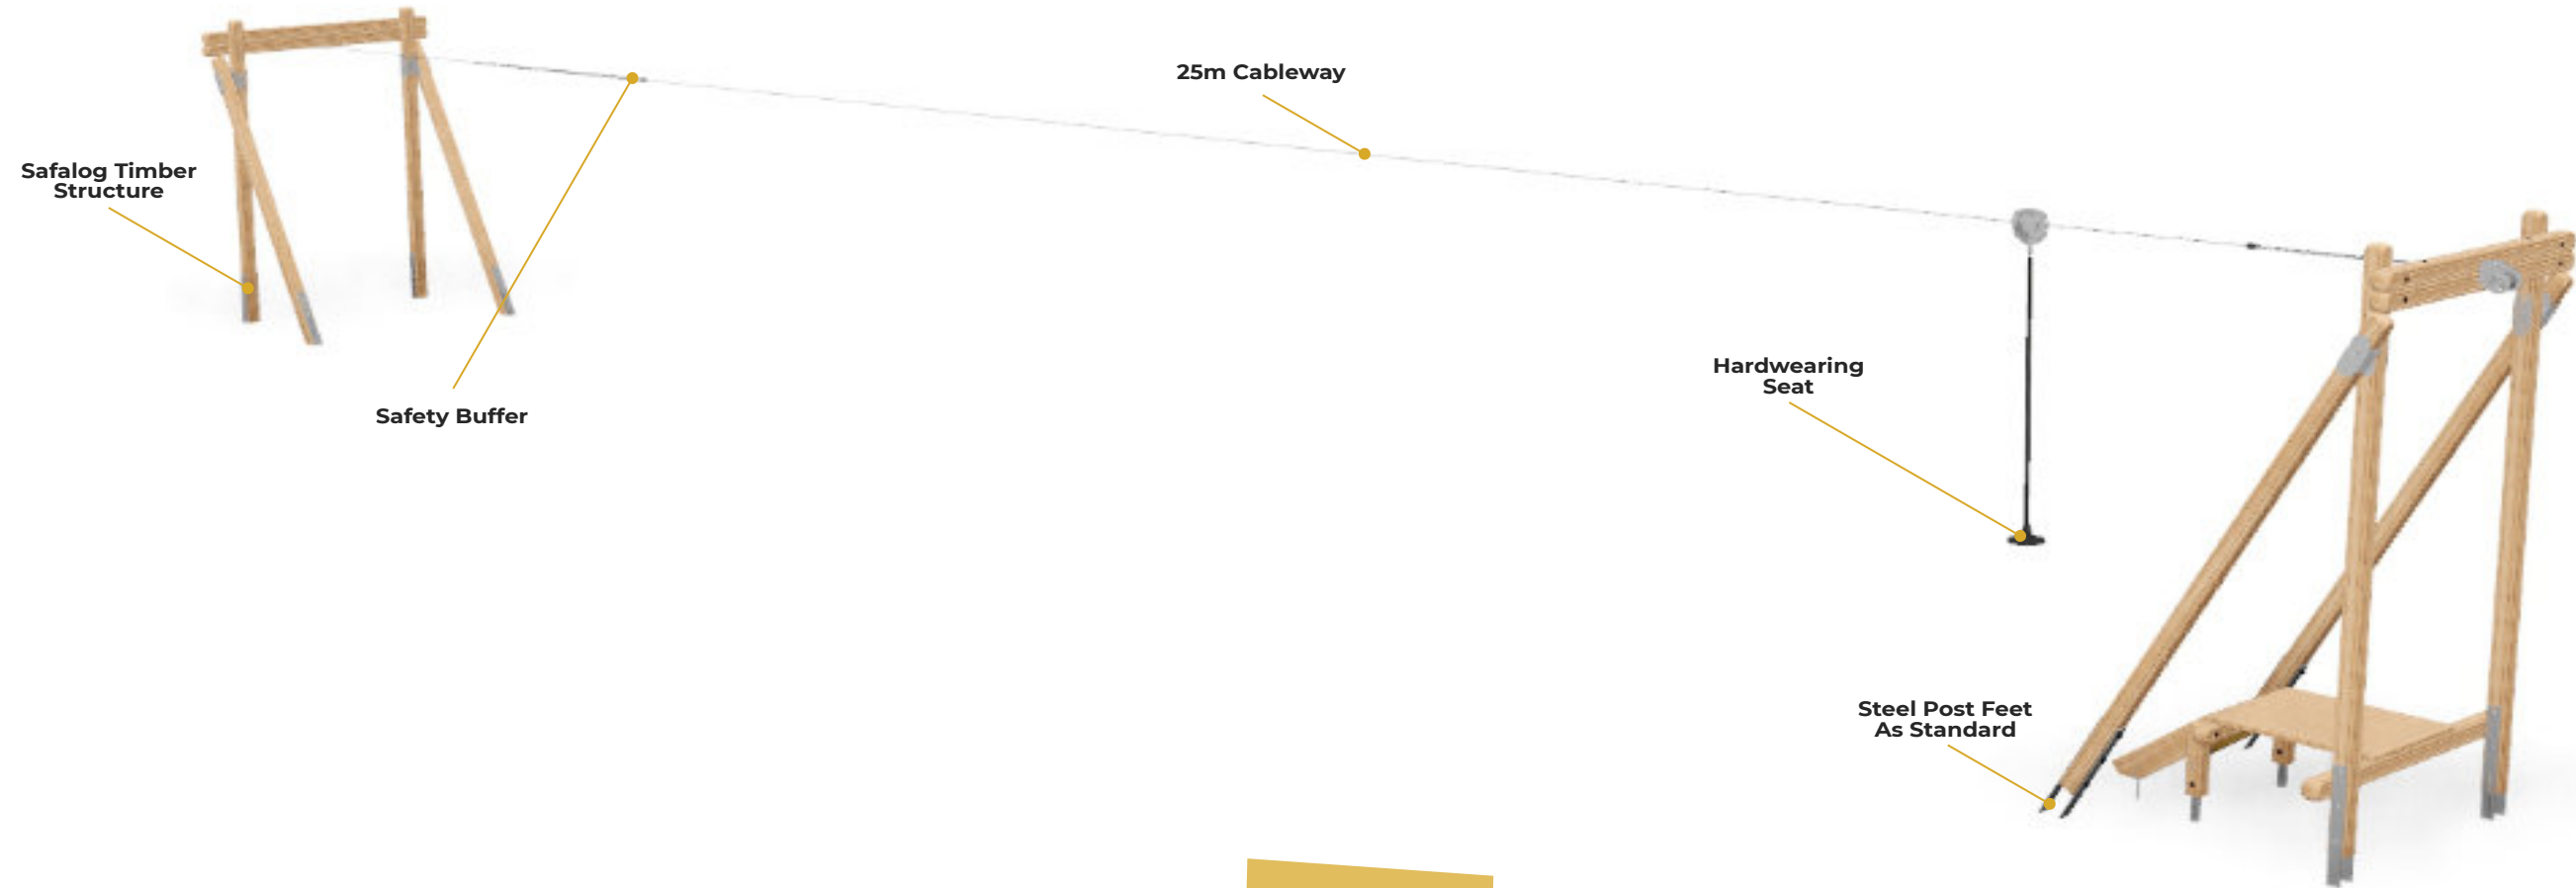

The Irazu Trim Trail combines Safalog, rope and HDPE panels to provide the most adventurous Key Stage 1 children with a challenge. Crossing the Burma Bridge, stepping across the Swinging Steps or traversing the colourful HDPE panels all test agility and balance. The Irazu Trim Trail includes five interconnected units to create a linear trim trail.

Aerial Cableway

Cableway/ Zipline

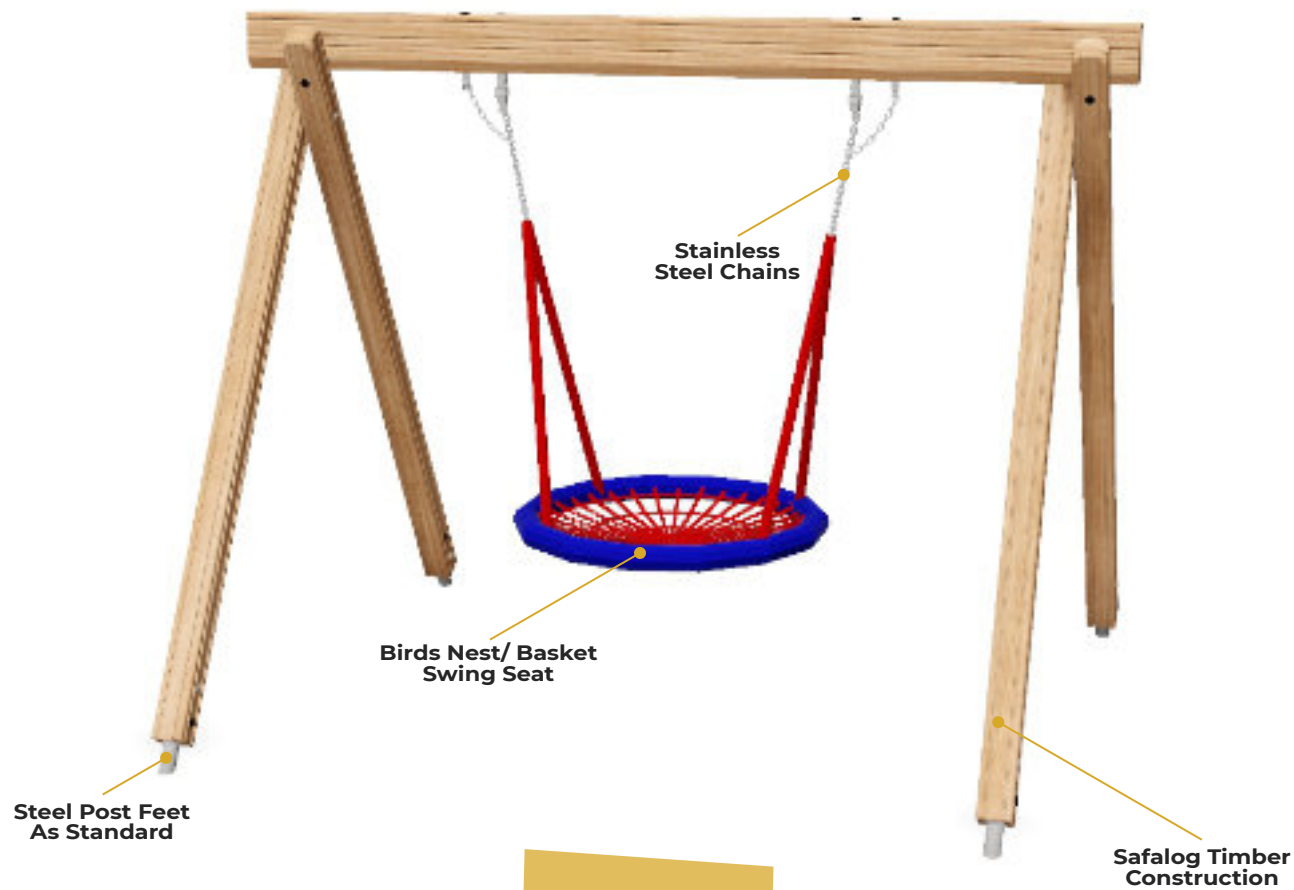

An Aerial Cableway to fly you to the moon! Well along 25m of the way at high speed with a safe landing. The 25m zip wire complete with moulded pendulum seat is a great asset to any play area. It can be installed without any safety surfacing, however we always recommend a wear path to prevent surface damage. The frame is made of Safalog, our natural looking, strong laminated timber.

Suitable for Children Aged **2+**

Guo Play Panels

Play Panels

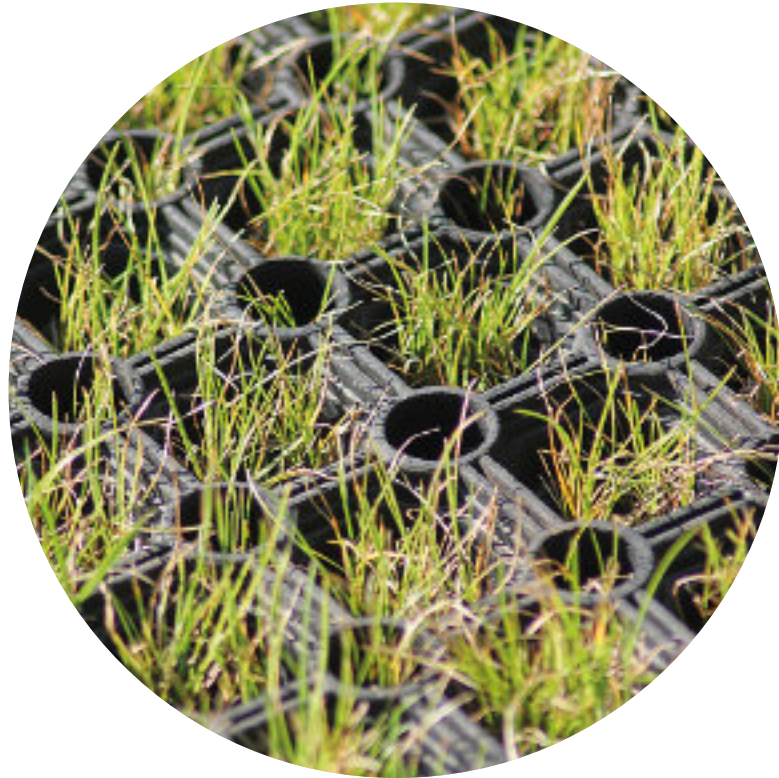

The Guo activity play panel centre will provide hours of fun whether counting the shapes, playing insect racing or simply counting from 1 to 10 the imagination is endless. This panel can be used as part of an activity room, for zoning so smaller spaces can be formed.

Number of Users **4**

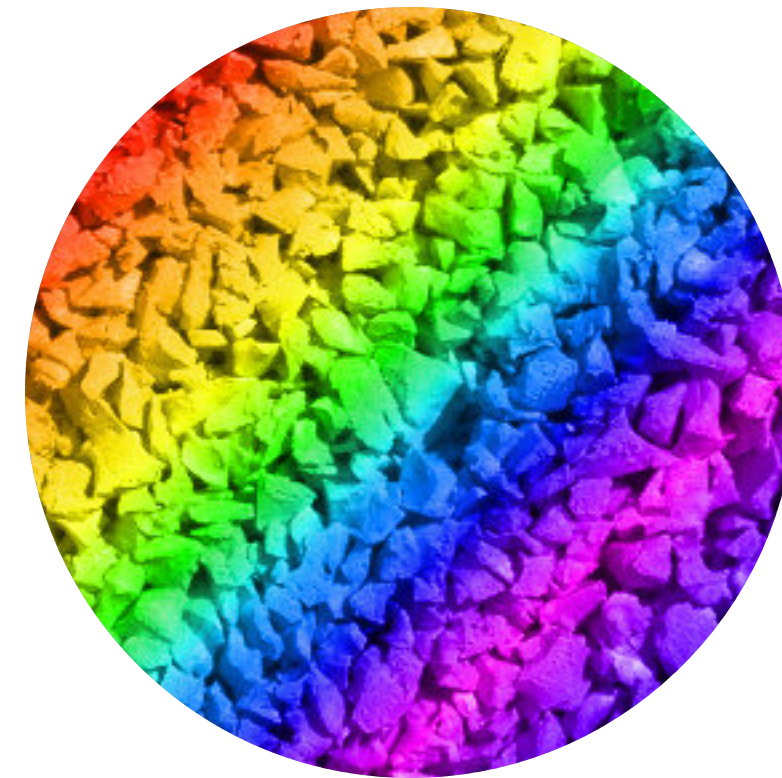

Suitable for Children Aged **1+**

Playspace Development

Safagrass Mats Safety Surfacing

Our rubber safagrass surfacing is an environmentally friendly, non-slip, impact absorbing safety and footway surface ideal for use around school playgrounds and public play areas. The surfacing provides a critical fall height of up to 2.3m subject to soil conditions. It's also wheelchair and pushchair friendly and can also be used for high-wearing walkways.

Coloured Wetpour Safety Surfacing

Our Wet Pour Rubber surfacing is suitable for all playground installations where impact absorbent surfacing is a requirement. It can be laid at various thicknesses depending on the critical fall height required. Wet Pour surfacing is mixed on site so complex equipment layouts and ground contours can easily be surfaced around.
